

Guillermo Rentería Hernández

Automation & API Integration Developer

Torreón, Coahuila, Mexico · renteriah.github.io · github.com/RenteriaH · linkedin.com/in/guillermo-renteria-9263052a6

SUMMARY

Software developer focused on integrations and automation: Shopify REST and GraphQL APIs on a production store, plus my own Python and Node.js systems with validation, tests and Linux deployment. I direct AI agents that write much of the code; my work is architecture, integration, review and verification.

TECHNICAL SKILLS

Backend & APIs: REST, GraphQL, WebSockets, OAuth, Node.js, FastAPI

Languages: Python, JavaScript, TypeScript, SQL

Data: PostgreSQL, DuckDB, Parquet, JSON/CSV

Testing: pytest, mypy, ruff, Playwright

Tools: Linux, systemd, Docker, GitHub Actions, Claude Code, Codex, MCP

EXPERIENCE

Software Developer Intern (Professional Residency) — MAHA Home de México Jul 2026 – Present

Torreón, Mexico · On-site

- Integrate and consume Shopify REST and GraphQL APIs, including bulk operations.
- Automate visual tests with Node.js and Playwright, improve Core Web Vitals and document each change.
- Organize and model product data with metafields and metaobjects.
- Build responsive components and features for product and cart pages on a production Shopify Plus store using Liquid, HTML, CSS and JavaScript.

PROJECTS

EcomOS — E-commerce operations platform · private repository

Python, FastAPI, Node.js, GraphQL, PostgreSQL, Docker, systemd, pytest

- Designed integrations with Shopify (GraphQL), Meta and a dropshipping supplier API behind write gates: dry run, approval, backup and readback.
- Deployed services to a Linux VPS with systemd, Docker and reversible releases; code written by AI agents under my review, with about 3,900 tests.

QCE — Real-time market data engine · private repository

Python, FastAPI, WebSockets, DuckDB, Parquet, React, pytest, mypy

- Defined the architecture and risk rules of a system that ingests REST and WebSocket data, stores it in Parquet and DuckDB, and requires human approval.
- Directed and reviewed code written mostly by AI agents; about 4,000 Python and 82 React tests, plus mypy and ruff.

Professional portfolio — Bilingual site with CI · public code

GitHub

Astro, TypeScript, Vitest, Playwright, GitHub Actions

- Shipped a bilingual site, built with AI agents, with content and end-to-end tests and continuous deployment to GitHub Pages.
- Verified Lighthouse 99–100 performance and 100 accessibility and SEO; a test blocks confidential terms.

EDUCATION

B.Eng. in Computer Systems Engineering — Instituto Tecnológico de La Laguna

2022 – Present

Technical High School Diploma in Electronics — CECyTEC

2021
