

Guillermo Rentería Hernández

Software Developer · Full Stack

Torreón, Coahuila, Mexico · renteg18@gmail.com · renteriah.github.io · github.com/RenteriaH · linkedin.com/in/guillermo-renteria-9263052a6

SUMMARY

Software developer working from frontend to backend: responsive components on a production Shopify Plus store, REST and GraphQL API consumption, and applications built with PHP, MySQL, Python and React. I test every flow end to end and use AI agents while reviewing each change.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, HTML, CSS, Liquid, React, Astro, Bootstrap

Backend & APIs: Node.js, PHP, Python, FastAPI, REST, GraphQL

Data: MySQL, PostgreSQL, SQLite, DuckDB

Testing: Playwright, Vitest, pytest, Core Web Vitals, WCAG

Tools: Git, GitHub Actions, Linux, Docker, Shopify

EXPERIENCE

Software Developer Intern (Professional Residency) — MAHA Home de México

Jul 2026 – Present

Torreón, Mexico · On-site

- Build responsive components and features for product and cart pages on a production Shopify Plus store using Liquid, HTML, CSS and JavaScript.
- Integrate and consume Shopify REST and GraphQL APIs, including bulk operations.
- Organize and model product data with metafields and metaobjects.
- Automate visual tests with Node.js and Playwright, improve Core Web Vitals and document each change.

PROJECTS

GYMWARRIOR — Academic web store (2024), hardened in 2026

case study

PHP, MySQL, JavaScript, Bootstrap, Playwright

- Fixed ten security issues with AI assistance: SQL injection (prepared statements), CSRF, unvalidated uploads and non-transactional checkout.
- Validated the fix with 13 Playwright end-to-end tests: 10 fail on the original and all 13 pass after hardening.

Professional portfolio — Bilingual site with CI · public code

GitHub

Astro, TypeScript, Vitest, Playwright, GitHub Actions

- Shipped a bilingual site, built with AI agents, with content and end-to-end tests and continuous deployment to GitHub Pages.
- Verified Lighthouse 99–100 performance and 100 accessibility and SEO; a test blocks confidential terms.

QCE — Real-time market data engine · private repository

Python, FastAPI, WebSockets, DuckDB, Parquet, React, pytest, mypy

- Defined the architecture and risk rules of a system that ingests REST and WebSocket data, stores it in Parquet and DuckDB, and requires human approval.
- Directed and reviewed code written mostly by AI agents; about 4,000 Python and 82 React tests, plus mypy and ruff.

EDUCATION

B.Eng. in Computer Systems Engineering — Instituto Tecnológico de La Laguna

2022 – Dec 2026 (expected)

Technical High School Diploma in Electronics — CECyTEC

2021

Languages: Spanish (native) · English (basic)
