

Guillermo Rentería Hernández

Software Developer · Integrations, APIs & Automation

Torreón, Coahuila, Mexico · github.com/RenteriaH · linkedin.com/in/guillermo-renteria-9263052a6

SUMMARY

Computer Systems Engineering student with web development experience on a production Shopify Plus store: Liquid, HTML, CSS and JavaScript interfaces, REST and GraphQL API integration, data modeling and web performance. In my own projects I work with Python, TypeScript and Node.js, automated tests and Linux deployment, directing AI agents and reviewing and verifying every change.

EXPERIENCE

Software Developer · Professional internship — MAHA Home de México

Torreón, Mexico · Jul 2026 – Nov 2026

- Customized the theme with Liquid, HTML, CSS and JavaScript, and built components and features for product and cart pages.
- Integrated and consumed Shopify REST and GraphQL APIs, including bulk operations.
- Organized and modeled product data with metafields and metaobjects.
- Improved web performance and user experience, measured with Core Web Vitals.
- Automated tasks and visual tests across screen widths with Node.js and Playwright.
- Debugging, maintenance, verified change control and technical documentation.
- Used AI agents in development, reviewing and verifying every change.

PROJECTS

GYMWARRIOR — PHP and MySQL store

PHP, MySQL, JavaScript, Bootstrap, Playwright

Academic web store with catalog, sign-up, cart, PayPal sandbox checkout and an inventory dashboard. Original build at school; hardening, tests and documentation in 2026 with AI assistance.

QCE — market data engine

Python, WebSockets, REST, DuckDB, Parquet, pydantic

Python system that ingests real-time crypto market data, stores and validates it, and requires human approval before any operation. Architecture, risk rules and validation criteria. Code written mostly by AI agents under my direction and review.

EcomOS

Python, FastAPI, Node.js, MCP, Shopify GraphQL, Meta Graph API

My own system to run a dropshipping store: catalog, supplier, pricing, ads and a control panel. Architecture, acceptance criteria and review. The code was written by AI agents (Claude Code and Codex) under my direction.

EDUCATION

B.Eng. in Computer Systems Engineering

Instituto Tecnológico de La Laguna · 2022 – present

Technical high-school diploma in Electronics

CECyTEC · 2021

SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS, Liquid, SQL, PowerShell

APIs & integration: GraphQL, REST, OAuth (client credentials), bulk operations, concurrency control, rate limits, MCP

Backend & operations: Node.js, FastAPI, Linux, systemd, Docker, Git, GitHub Actions

Testing & quality: pytest, Vitest, Playwright, visual regression, Core Web Vitals, WCAG contrast

Data: Constraint-aware modeling, auditing and reconciliation, JSON/JSONL/CSV, SQLite

Languages: Spanish (native) · English (developing)
